

ADVANTAGE
ENGINE PARTS

Platinum **P**erformance **S**eries

Advantage Engine Parts introduces our **Platinum Performance Series**, exclusively for these John Deere® engines:

4-270 early	6-404T early
4-270 late	6-404T late
6-404 early	6-466T early
6-404 mid	6-466T late
6-404 late	

Platinum Performance Series is also available for several John Deere® combine and industrial applications.

Pistons in these overhaul kits are produced from an aluminum hypereutectic alloy. This allows the pistons to:

- + retain a high percentage of strength and hardness during normal operations
- + have a very low coefficient of thermal expansion
- + have a higher resistance to wear
- + have a higher tensile strength
- + help extend the life of the engine

The combustion bowls in these pistons have been enhanced to create higher compression to improve starting of the engine.

These applications cover the majority of the agricultural tractors in which these kits can be used:

3010, 3020, 4000, 4010, 4020, 4040, 4230, 4250, 4320, 4430, 4440, 4450, 4520, 4620, 4630, 4640, 4650, 4840, and 4850

For an additional **ADVANTAGE**, order some of these kits during your next call to us.
